

[ Everost, the first veterinary company to focus on Regenerative and Sports Medicine, is improving animal's lives by advancing science, safety & innovation. ]

### The New Innovative Company

Welcome to Everost, an innovative company dedicated to restoring mobility, alleviating pain and helping the millions of companion animals around the world find renewed vitality. The founders of Everost have over 30 years experience in the creation of products and services that have changed many aspects of veterinary medicine, making it a better market place than when they entered it in 1997.

Everost, the first veterinary company to focus on Regenerative and Sports Medicine, is improving animal's lives by advancing science, safety and innovation. We strive to introduce breakthrough and innovative products that help the patient's body heal, more naturally.

### Meet the Team!

Co-founder of Everost, Harry Wotton has reshaped many aspects of veterinary orthopedic surgery by continually innovating new products, procedures and educational programs. He has introduced ground breaking products such as the lateral suture crimping system, tibia plateau leveling plates, break off bone anchors, tibial tuberosity advancement implants, orthopedic fibers and many more. Harry has also spent most of the last 2 years researching and developing products for CCL replacement in dogs, as well as, the first ever canine hip resurfacing implant system. He is very passionate about advancing the veterinary orthopedic market through innovation, education and customer service. Harry has numerous United States Patents for his innovative work in veterinary medicine.

Co-founder of Everost, Darroll focuses on achieving revenue growth through global expansion, product line expansion and the development of industry first collaborative customer programs. He has also successfully developed and implemented several strategic planning and transaction life cycle processes that dramatically increased operational efficiencies.

## Everost Educational Excellence Program Overview

**E<sup>3</sup>** provides world-class veterinary surgical training and education courses. It offers orthopaedic surgeons and veterinarians a full range of educational opportunities, including hands-on workshops and surgeon-to-surgeon programs. The founders of Everost have trained over 15,000 surgeons worldwide.

Today's veterinary surgeon has spent years fine tuning their skills and knowledge. Surgical training is a life-long process that started the first day of veterinary school and followed by extensive surgical education throughout their careers.

**E<sup>3</sup>** was born from 17 years of educational commitment across the globe. The program provides cadaveric training and interactive training on the Everost line of products on a global basis. This excellence program enables surgeons to gain new knowledge, develop new skills that optimize patient outcomes and help patients get back to daily activities as fast as possible.
